

Grupo Tergo Laf

Solutions that combine know-how, technology and compromise for our clients to know, in a 100% trustworthy manner, the true state of their pipes.

We certify our commitment.

Who we are

Grupo Tergo Laf is an independent company that provides solutions in the field of integrity and reliability of Gas & Oil facilities, with a vast experience in the assurance of the integrity of transport pipes, facilities and process plants.

CONVENTIONAL AND SPECIAL NON DESTRUCTIVE TESTING

END

Tergo Laf Group offers a wide variety of non destructive conventional and non conventional testing.

The ultimate goal of this testing is to know the condition of the evaluated components, by the detection of discontinuities (either due to the manufacturing process or caused by the process or service in which the component operates), that may put at risk the mechanical integrity of the component or the system functionality.

END

Among the conventional non destructive testing can be mentioned:

- Dye penetrant inspection.
- Magnetic Particle inspection.
- Gamma Exposure.
- Ultrasonic (straight and shear wave).
- Eddy Current.
- MFL in Tank Floors.

EVALUATION OF DEFECTS AND INSPECTION

As part of the field service we provide:

- Measurement of anomalies on field, found during the internal inspection of pipes.
- Computation of the fail pressure in accordance with the applicable code.
- ASME B31G, RSTRENG
- Evaluation of plane and volumetric defects.
