

# Grupo Tergo Laf

Solutions that combine know-how, technology and compromise for our clients to know, in a 100% trustworthy manner, the true state of their pipes.

We certify our commitment.

# Who we are

Grupo Tergo Laf is an independent company that provides solutions in the field of integrity and reliability of Gas & Oil facilities, with a vast experience in the assurance of the integrity of transport pipes, facilities and process plants.

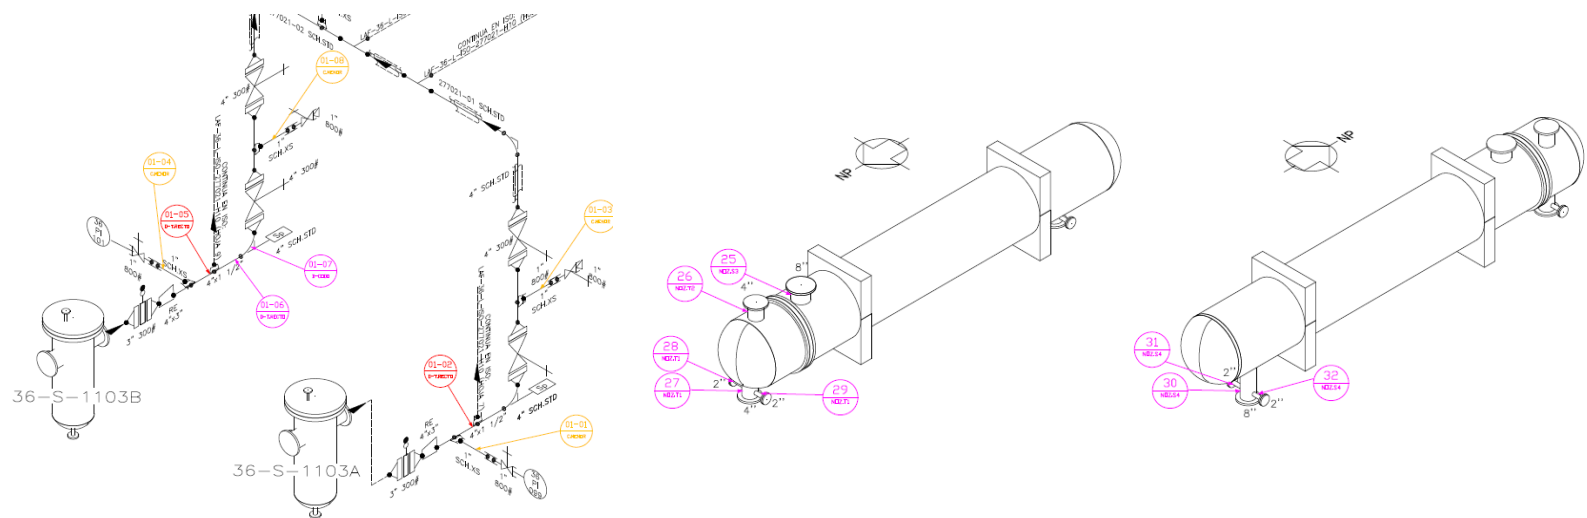

# INSPECTION PLANS DEVELOPMENT

**Tergo Laf Group** offers integral services of inspection blueprints and field survey. In an enunciative and non-limiting nature, it stands out:

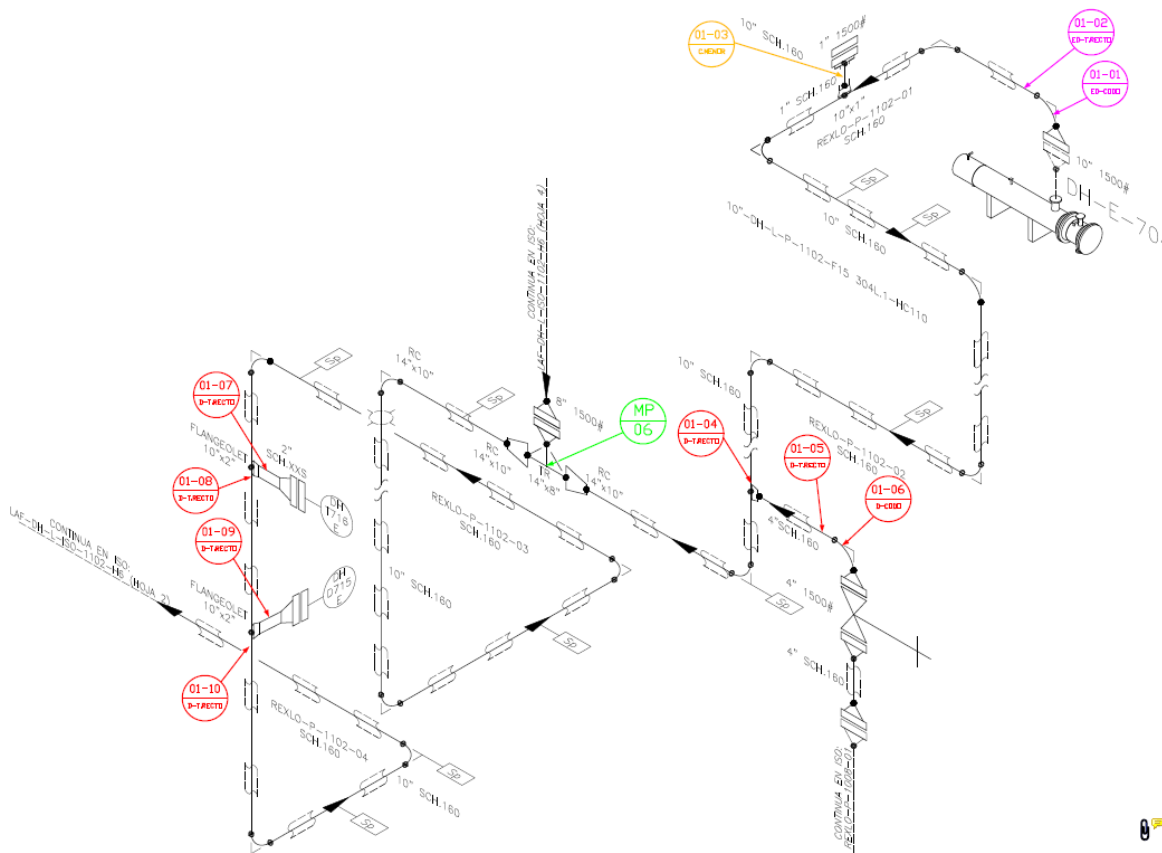

- **Definition of circuits**

A process, flow diagrams and corrosion mechanism study is developed, to define the circuits on which an inspection plan will be developed.

# INSPECTION PLANS DEVELOPMENT

## • Inspection Isometry

An integral P&ID, Piping Class and 3D model study is done for the isometric blueprints realization and location of the inspection points, using for this purpose a CAD software.

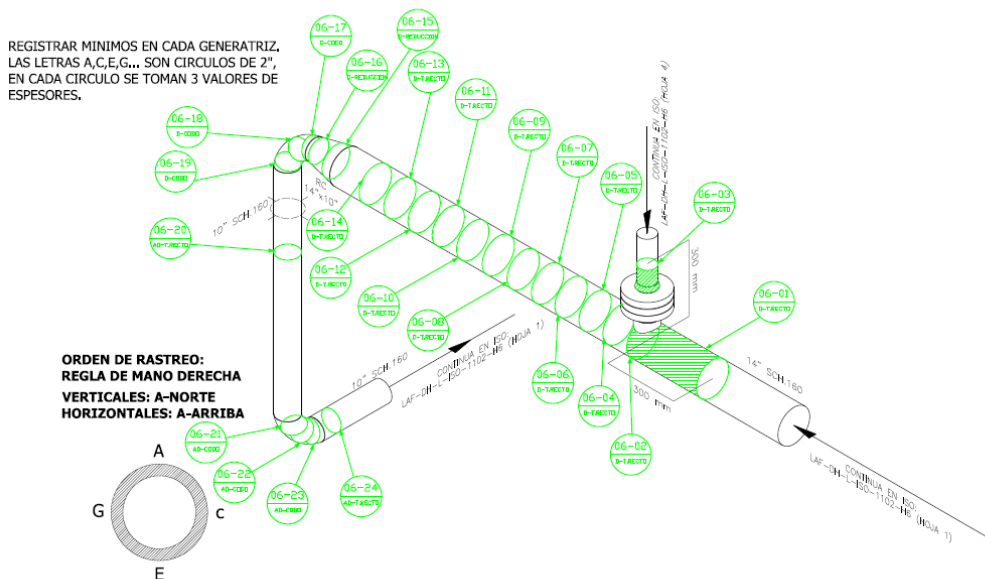

# INSPECTION PLANS DEVELOPMENT

## •Base 0 field measurement

With the blueprints done a field survey is developed to obtain the inicial thickness by the use of non destructive techniques o xray.

With this you achieve:

- Control of the initial thickness,
- Control of the de deviations in the manufacturing process,
- Set the correct bases for future integrity computation of the assets.
